Risk Cycle in Paragon

RISK CYCLE

Crisis management is more than just acting during an emergency itself.

[Read more →](#)

IDENTIFYING RISKS

Each municipality and province maps the risks in its territory.

[Read more →](#)

PREVENTION

Governments take a number of actions to prevent emergencies.

[Read more →](#)

PREPARATION

Governments prepare for potential emergencies.

[Read more →](#)

CRISIS MANAGEMENT

Working together during an emergency is done according to fixed agreements and structures.

[Read more →](#)

RECOVERY

After an emergency, there are still a lot of measures to be taken.

[Read more →](#)

EVALUATION

An evaluation takes place after every emergency.

PARAGON – *Marhetak*

The why?

Why we choose this approach to develop Paragon

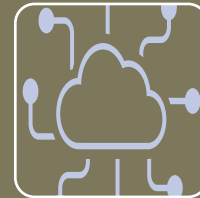

PARAGON – *Marhetak*

Why we do Paragon this way?

Historical

- Deadline replacement old system (ICMS)
- Difficult adoption by users
- ICMS was U.S. made proprietary software, dependency

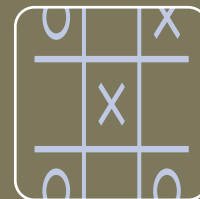

Technology

- Most modern for Paragon baseline
- Of own choice
- Future tech ready (IoT, AI, ...)
- Intellectual property

Financial

- No vendor lock-in
- License free
- Long term financing requirement
- Tender impossible due to changing needs

Strategic

- Ability to share platform and technology with partners
- Complete control of roadmap
- Priorities of our own choice

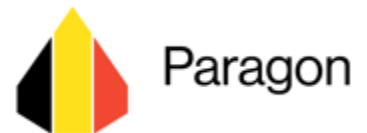

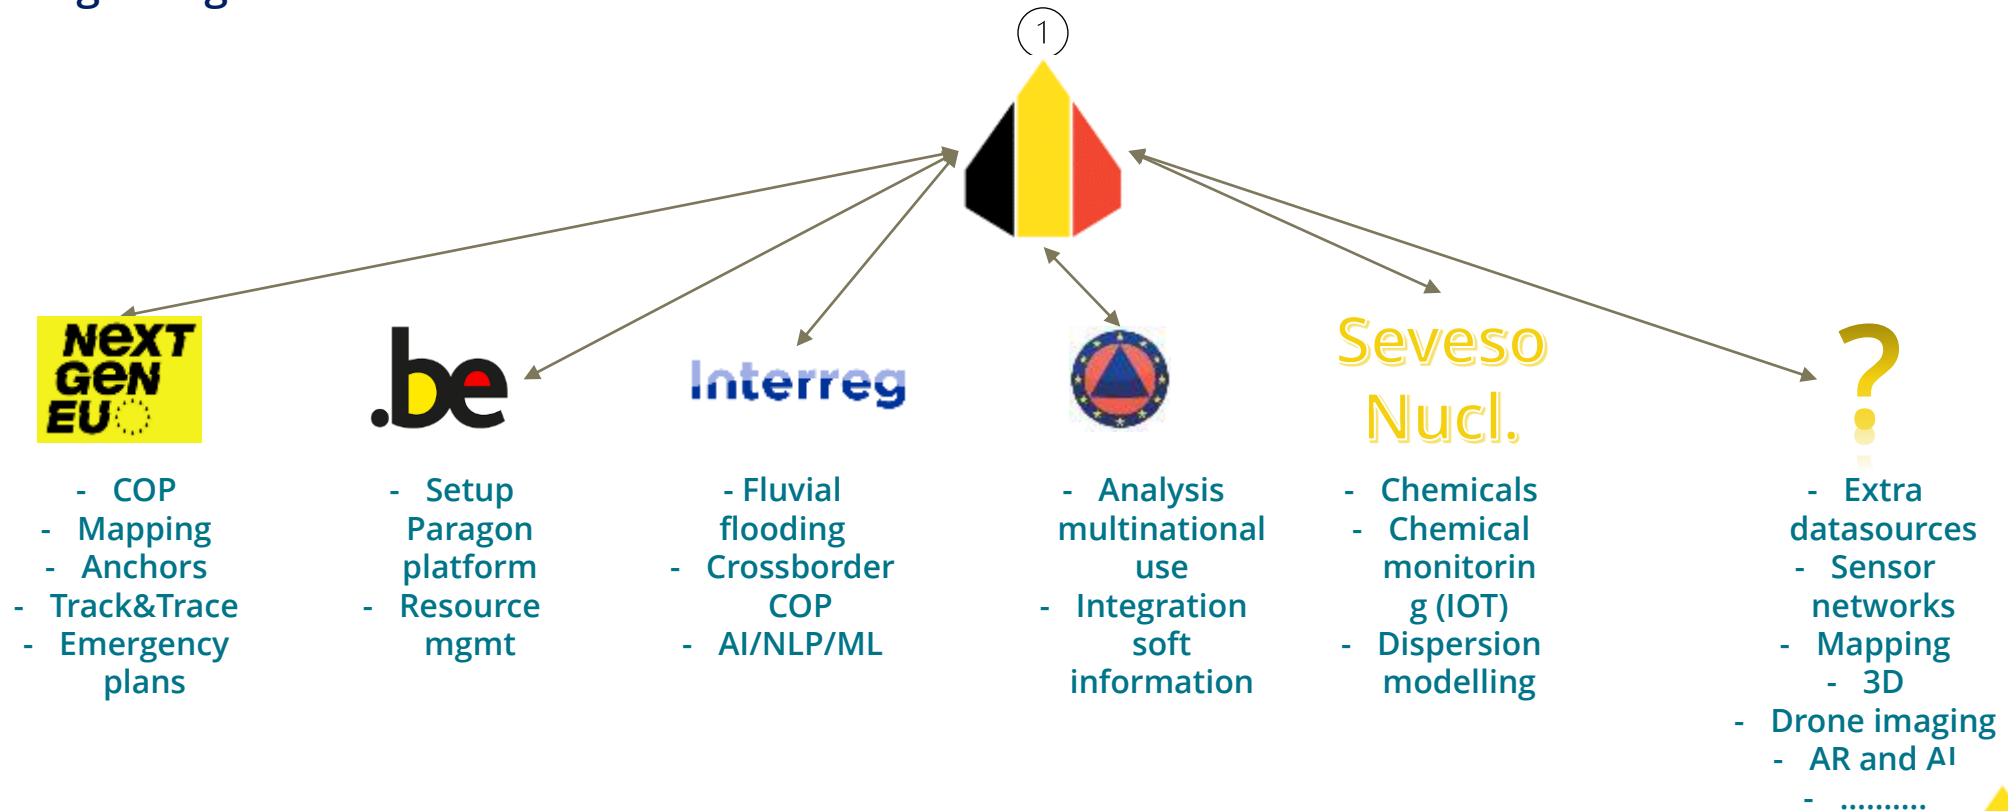

PARAGON – *Marhetak* Leverage of E.U. funding

Our funding and how we use leverage and consolidation

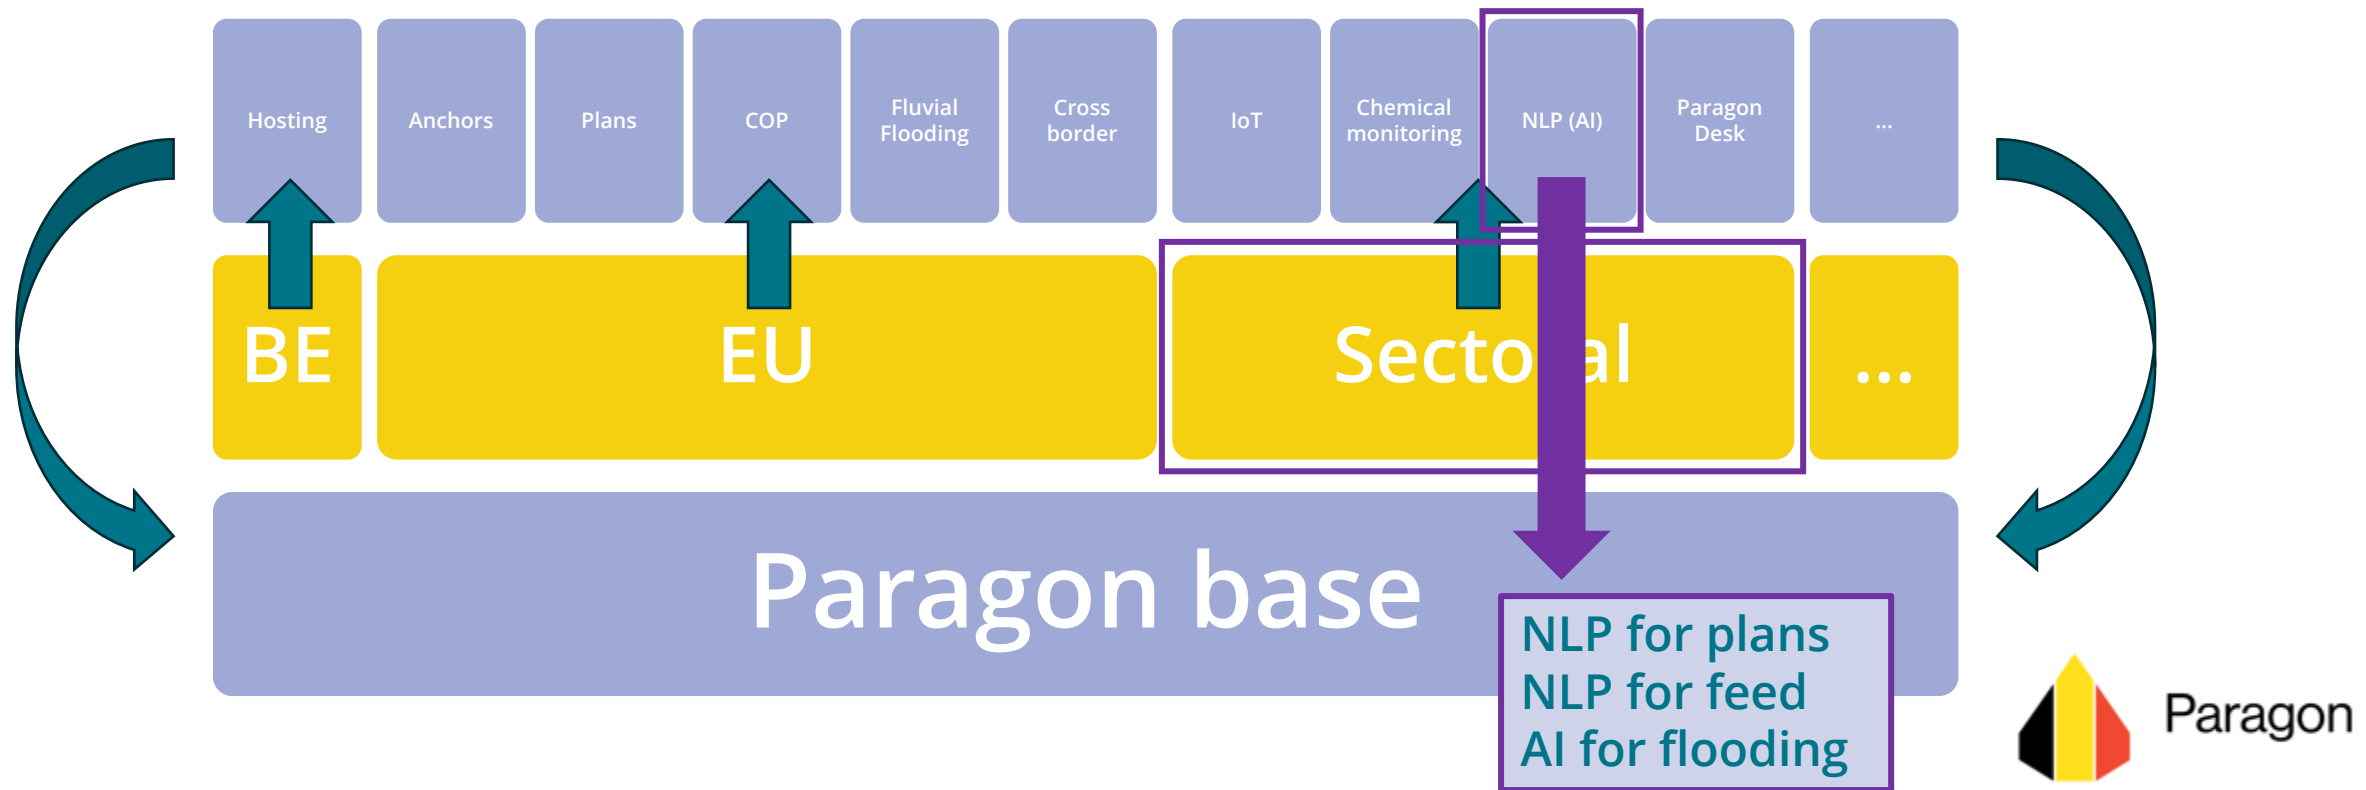

PARAGON – *Marhetak*

Funding Paragon

PARAGON – *Marhetak*

Funding Paragon - leverage

in the Paragon revolution!
